Client KYC Onboarding Strategy and Workflow

Intake with Jotform. Processing, review and decisions on our platform.

Strategy paper, sketches, contact plan, client letters, fee procedure and documentation

Prepared 19 October 2026

Planning document only. KYC, AML and privacy duties differ by industry and country. Every rule, threshold and retention period in this paper is to be confirmed with the relevant legal bodies, authorities and entities of Namibia (or your jurisdiction) before go live.

The idea in one page

Jotform is the front door. The platform is the engine room and the record keeper.

JOTFORM (intake only)

- Branded KYC form, mobile friendly
- Document and selfie uploads
- E signature and consent
- Conditional logic per client type
- Sends each submission out by webhook

PLATFORM (the brain)

- Receives and validates every submission
- Screens, scores risk, flags gaps
- Assigns work, tracks deadlines
- Approval and decision with audit trail
- Single client record for life

PEOPLE (the judgment)

- Compliance officer reviews cases
- Manager approves high risk
- Relationship owner talks to client
- Exceptions and overrides are logged
- Periodic review stays human led

Three design rules

- Jotform never decides. It collects. All decisions, scores and statuses live on the platform.
- One client, one record. Every submission, file, check and note attaches to the same client ID.
- Nothing moves without a trail. Every status change records who, what, when and why.

Quick win: start with Jotform + webhook + a case queue. Add screening and scoring in phase 2.

Avoid: asking for everything in one long form. Ask the minimum first, request more only when risk needs it.

Big picture: the journey sketch

From invitation to active client. Numbers match the step list on the next page.

invite by email, WhatsApp or QR

1. **Client gets link**
2. **Jotform KYC form**
3. **Webhook to platform**
4. **Intake queue**
5. **Review and decide**
6. **Active client**

If something is missing

- Platform emails a secure link back to the same Jotform submission (edit link)
- Case status: Waiting for client
- Reminder after 3 and 7 days

Inside the platform

- Validate and de duplicate
- Store files securely
- Screen: ID, sanctions, PEP
- Risk score: low, medium, high
- Create case and assign

Outcomes

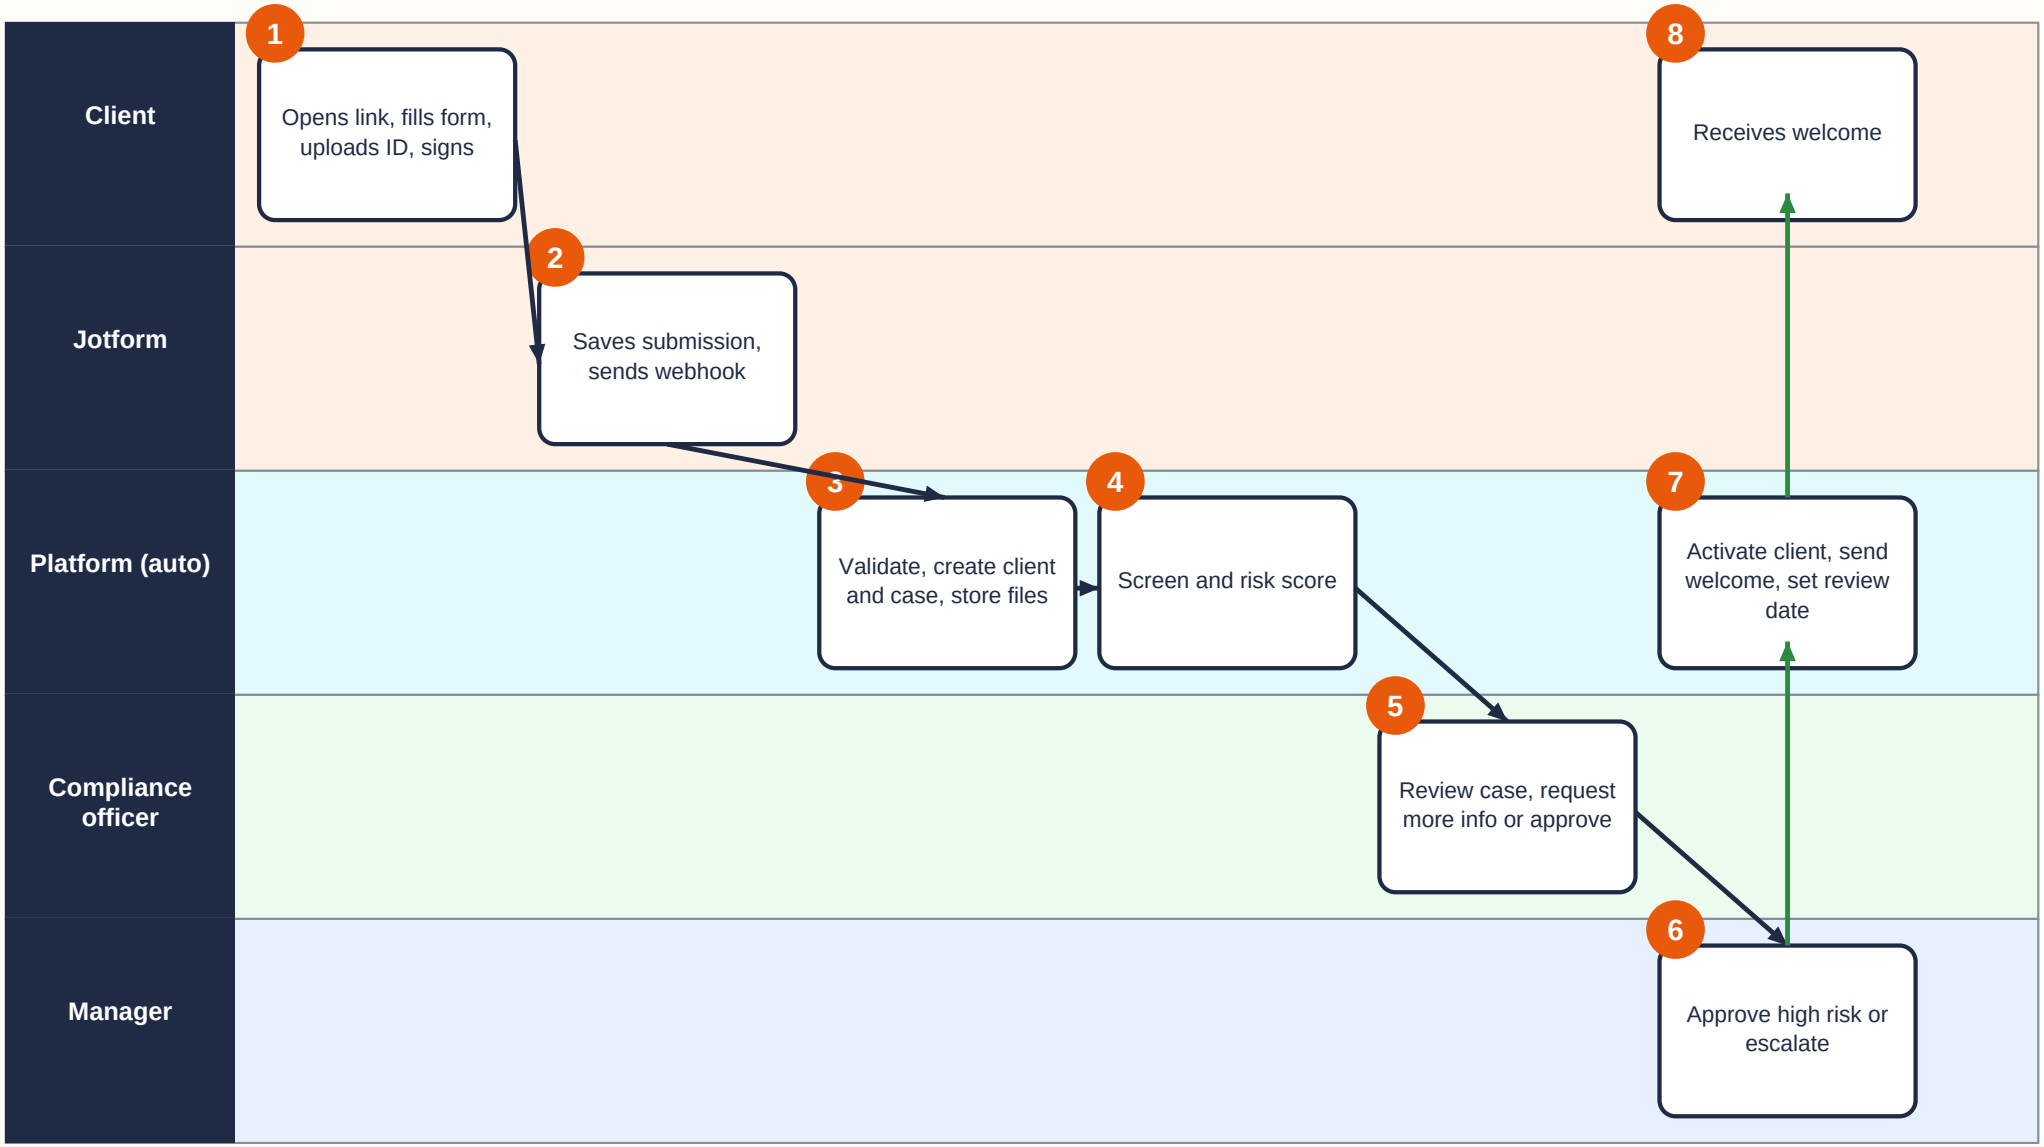

- Approved
- Approved with conditions
- Declined, with reason
- Escalated to manager

After approval: welcome pack, account or service setup, review date diarised, monitoring switched on.

Feedback loop: reminders, expiry alerts (ID, proof of address), periodic reviews and trigger events send the client back through a short Jotform update form that lands on the same record.

Step by step swimlane

Who does what, in order. Print this page and tick steps as you build.

Loop: at step 5 if information is missing, the case returns to the client (step 1) via the Jotform edit link. Low risk cases can skip step 6.

Designing the Jotform KYC form

Short, staged and conditional. Collect the minimum, escalate only when needed.

1 Who are you?

Type: individual / company / trust
Name, ID or registration no.
Date of birth or incorporation
Contact details

2 Where and how?

Residential or registered address
Proof of address upload
Occupation / nature of business
Source of funds (dropdown)

3 Documents

ID or passport upload
Selfie holding ID (optional)
Company: registration docs, directors, beneficial owners

4 Declarations

PEP declaration yes / no
Purpose of relationship
Expected activity

5 Consent and sign

Privacy notice and consent tick
E signature
Auto timestamp

Conditional logic (show or hide)

- Company selected: show directors, beneficial owners (add more with a repeating section), registration certificate.
- PEP yes: show position held, source of wealth, and flag the case high risk on the platform.
- Expected activity above threshold: show extra source of funds evidence.

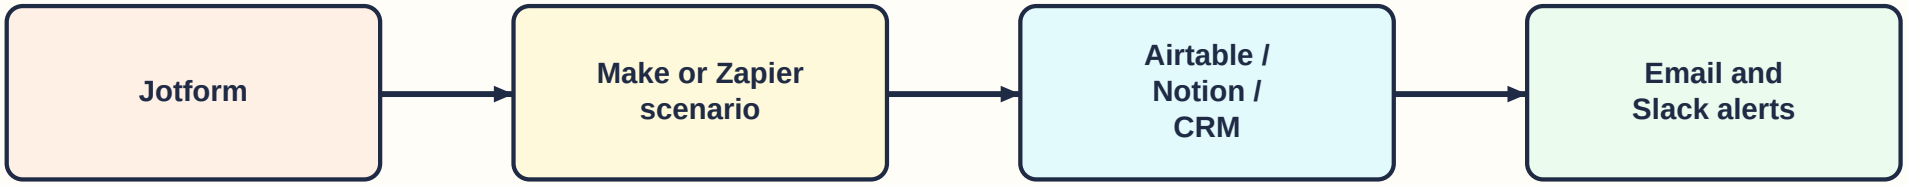

Jotform settings to switch on

- Hidden field: clientID or invite token (links submission to the platform)
- Webhook to the platform endpoint, plus a shared secret
- Submission editing and email link for corrections
- Encrypted form and HIPAA / data protection options on a plan that supports them
- Limit uploads to PDF, JPG, PNG, under a set size

Integration sketch: how data flows

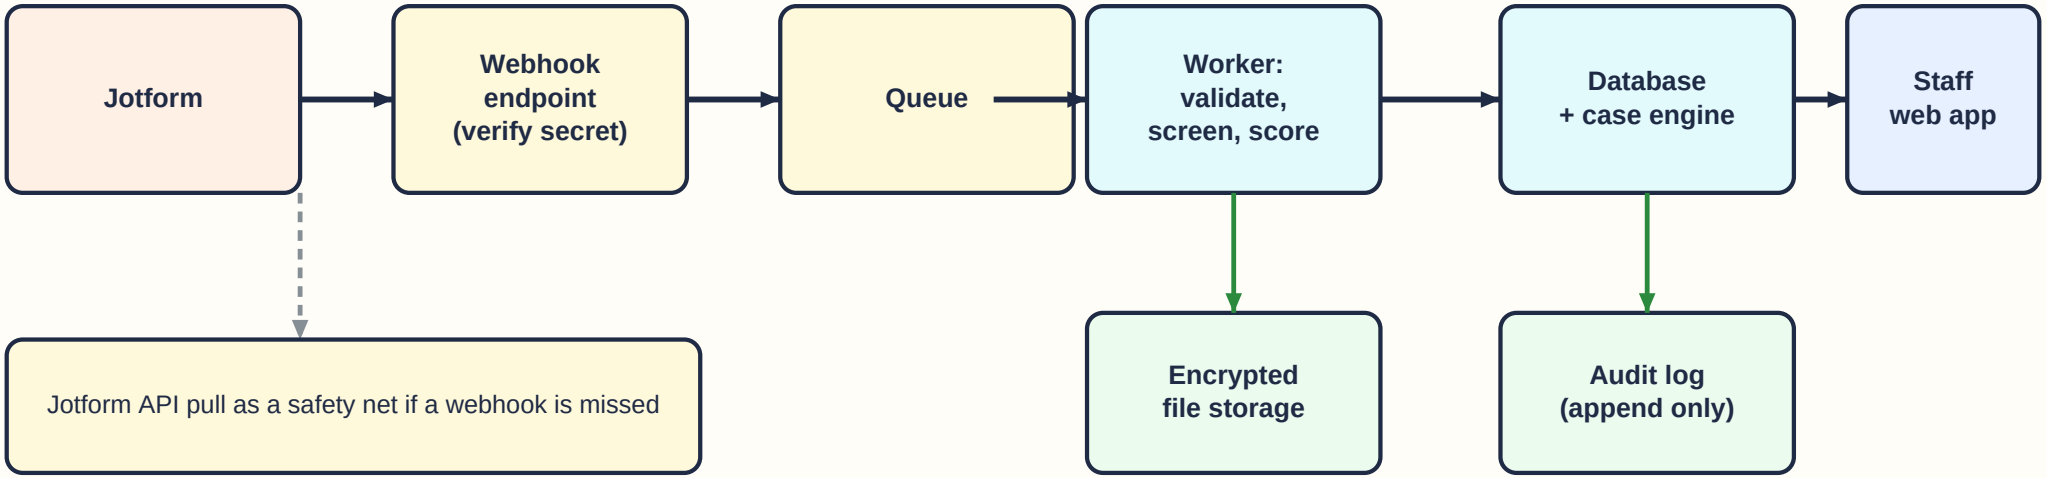

Two options. Choose by team skill and volume.

Option A: low code (fastest, 1 to 2 weeks)

Good for pilots and under about 300 clients a month. Watch costs and where documents are stored.

Option B: custom platform (control, scale, audit)

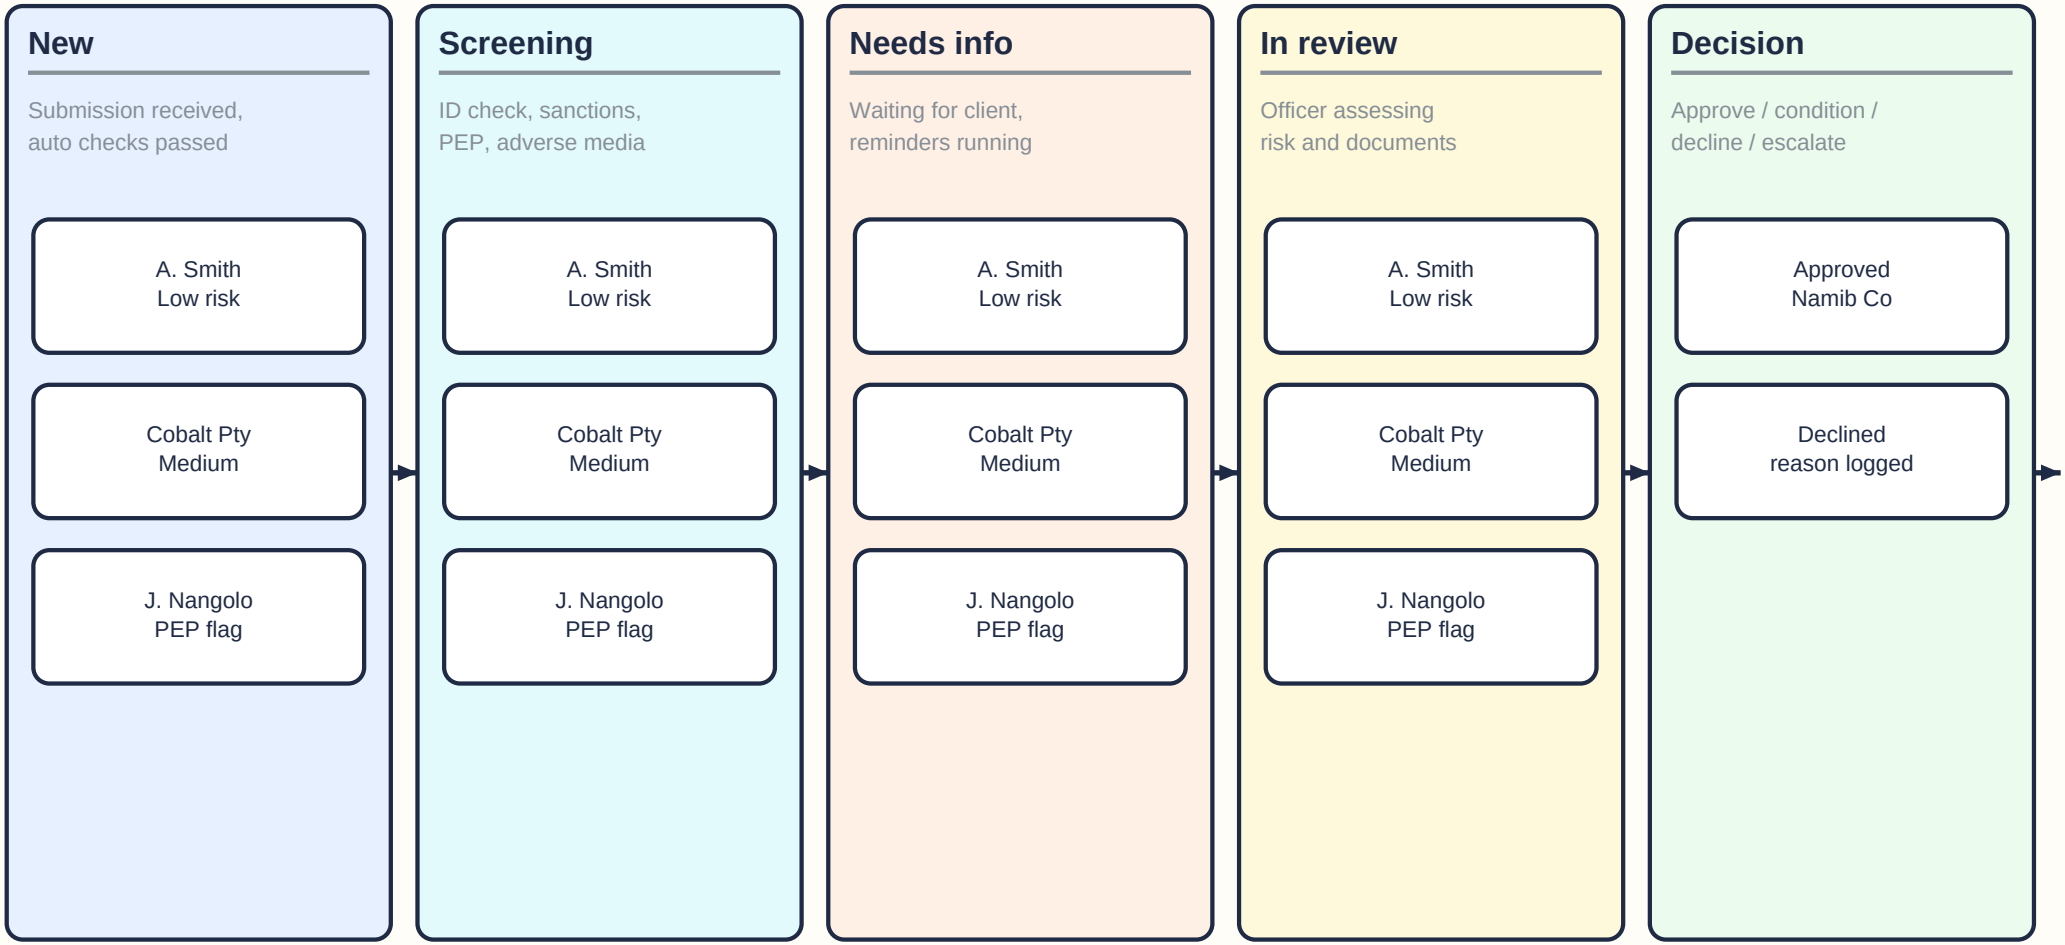

Both options: Jotform keeps only a copy. Download files to your own secure storage and set Jotform auto delete once the platform confirms receipt.

Recommendation: begin with Option A to prove the workflow, design your data fields as if for Option B, and migrate when volume or audit needs grow.

After Jotform: processing on the platform

A case board your team can work from every day.

Daily routine

- Start at Needs info and In review: oldest first
- Check SLA timers: target e.g. 2 working days for low risk, 5 for high
- Every card holds: form answers, files, checks, notes, history
- Moving a card forces a reason when going to Decline or Escalate

Client record and risk scoring

What the platform stores and how a case is graded.

Client record (one per client)

- Identity: name, ID no., DOB, type
- Contacts and addresses
- Documents with expiry dates
- Beneficial owners and directors
- Screening results and dates
- Risk rating and reasons
- Decisions, conditions, approver
- Review schedule and next due
- Full audit history
- Communication log

Simple risk score (example, tune with your compliance adviser)

Factor	Points
Individual, local, salaried	0
Company or trust	+1
Cash intensive business	+2
PEP or close associate	+3
High risk country link	+3
Missing or expired document	+2
Source of funds unclear	+2

0 to 2
LOW
officer approves

3 to 5
MEDIUM
officer + checks

6 plus
HIGH
manager approves

Points are illustrative only. Final criteria must follow your regulator and legal advice.

Roles, approvals and protecting the data

Controls that make the process trustworthy.

Roles

Client service

Sends invites, answers clients, sees status only

Compliance officer

Reviews cases, requests info, approves low and medium

Manager / MLRO

Approves high risk, overrides, sees all

Admin

Manages users and form mapping, no case approval

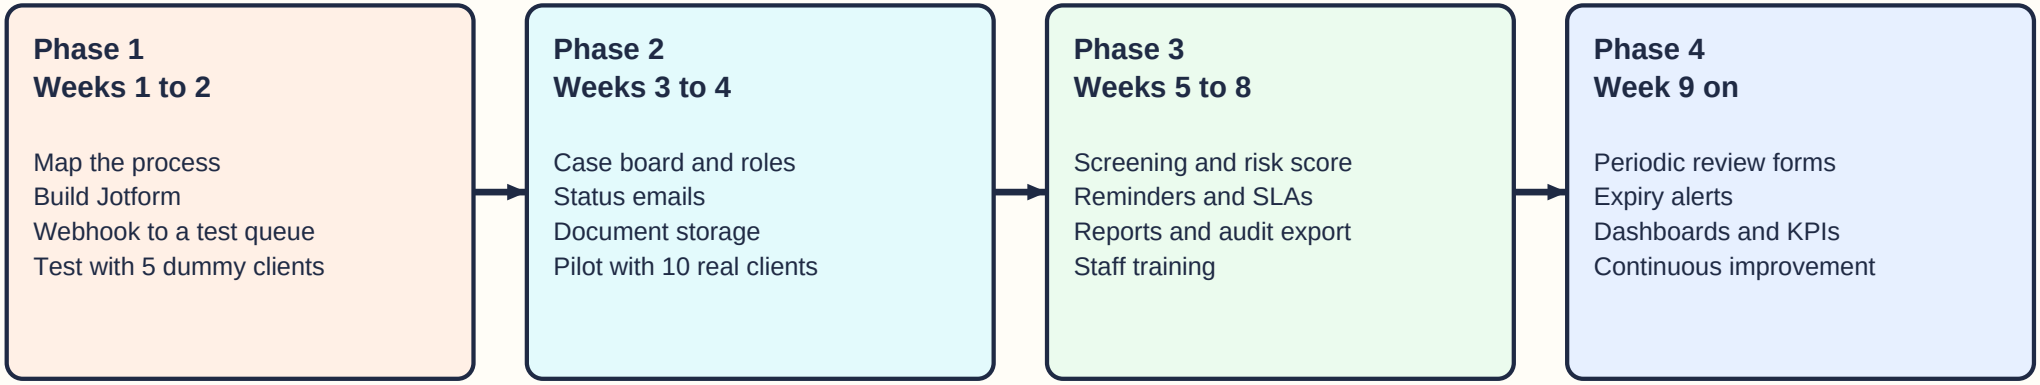

Data protection basics

- Collect only what you need and say why
- Encrypt files and data at rest and in transit
- Role based access; staff see only their cases
- Append only audit log of views, edits and decisions
- Two person rule for declines and overrides
- Retention schedule and secure deletion
- Remove copies from Jotform after import
- Breach response contact and steps written down

Legal check required: KYC and anti money laundering obligations (customer due diligence, record keeping, reporting, privacy and data protection) are to be confirmed with the relevant legal bodies, authorities and entities of Namibia. Nothing here is a claim of compliance, accreditation or approval.

Roll out in four phases

Prove it small, then widen.

KPIs to track

- Time from submission to decision
- Share of submissions complete first time
- Cases waiting on client over 7 days
- Approvals by risk band, overrides and declines

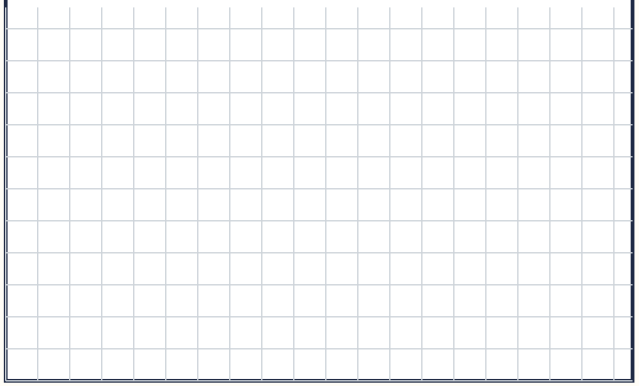

Decisions we need from you

- Client types in scope: individuals, companies, trusts?
- Which platform: low code (A) or custom (B)?
- Screening provider and budget
- Who is the compliance officer and approver?
- Volume per month and any deadline

Physical working outline: print and draw

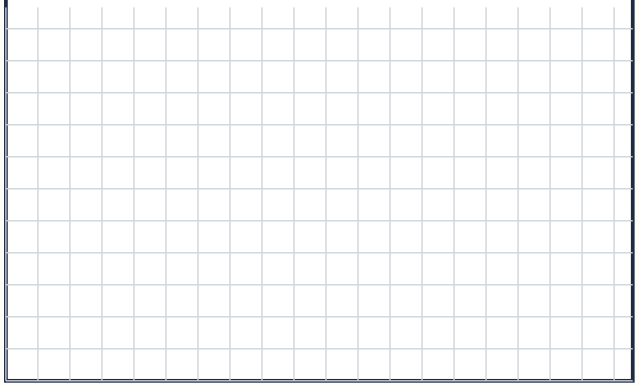

Print this page. Sketch the journey by hand, then tick each box when built.

1 Client invite

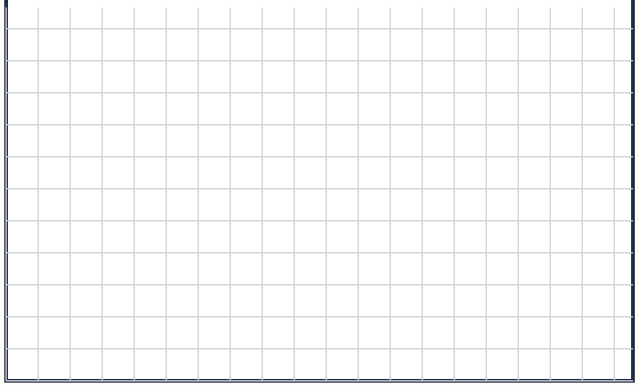

Owner: _____ Done by: _____ [ ]

2 Jotform screens

Owner: _____ Done by: _____ [ ]

3 Webhook and queue

Owner: _____ Done by: _____ [ ]

4 Platform case view

Owner: _____ Done by: _____ [ ]

5 Review and decide

Owner: _____ Done by: _____ [ ]

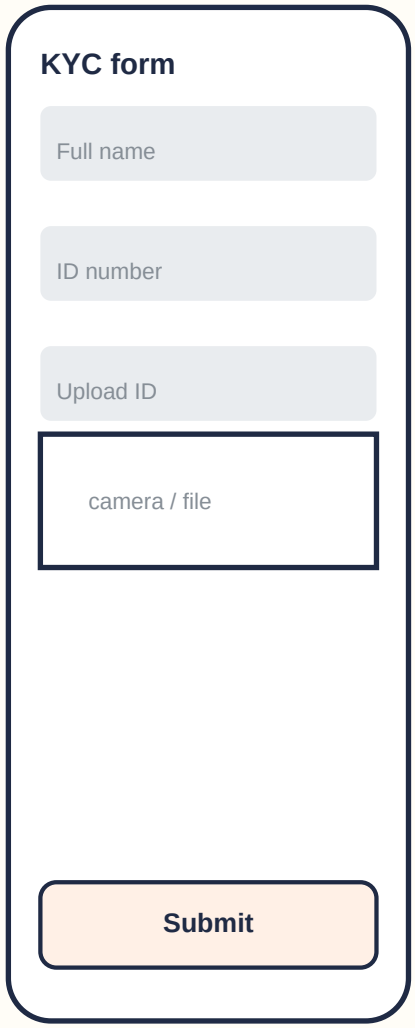

6 Welcome and monitoring

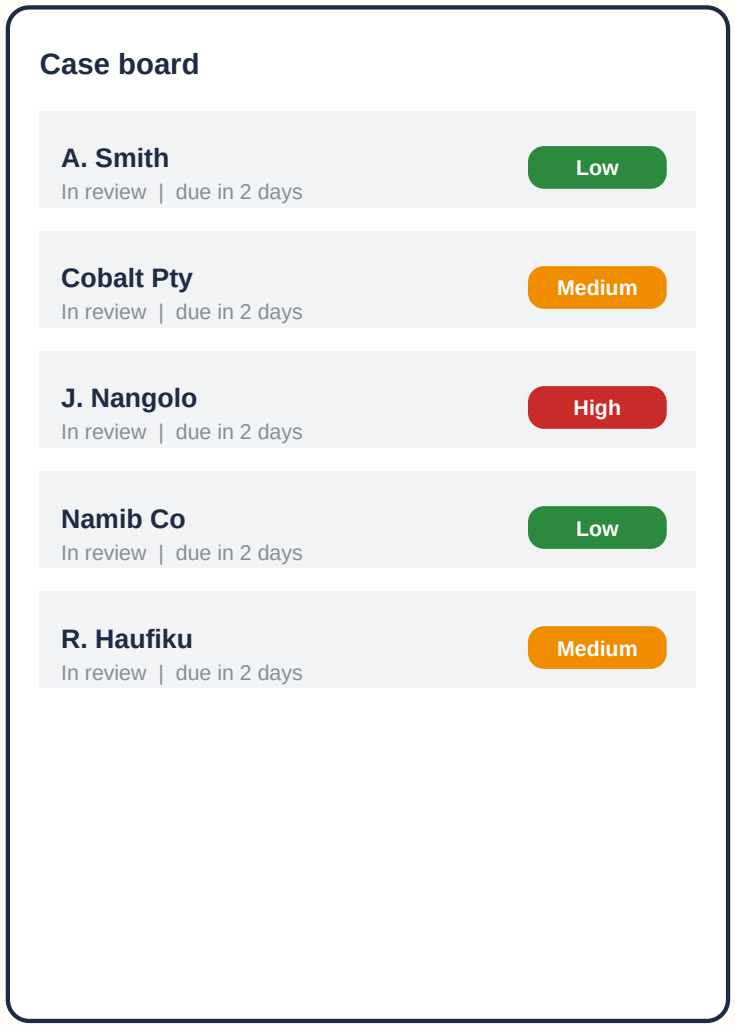

Owner: _____ Done by: _____ [ ]

Screen sketches: what staff and clients see

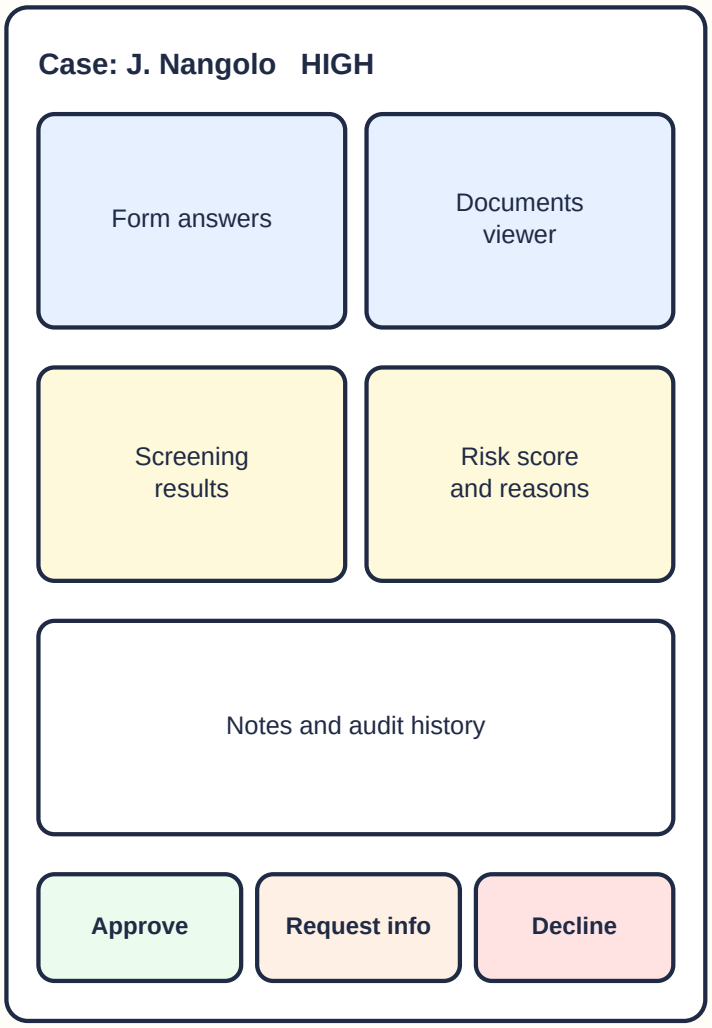

Low fidelity wireframes to guide the build.

Client on phone (Jotform)

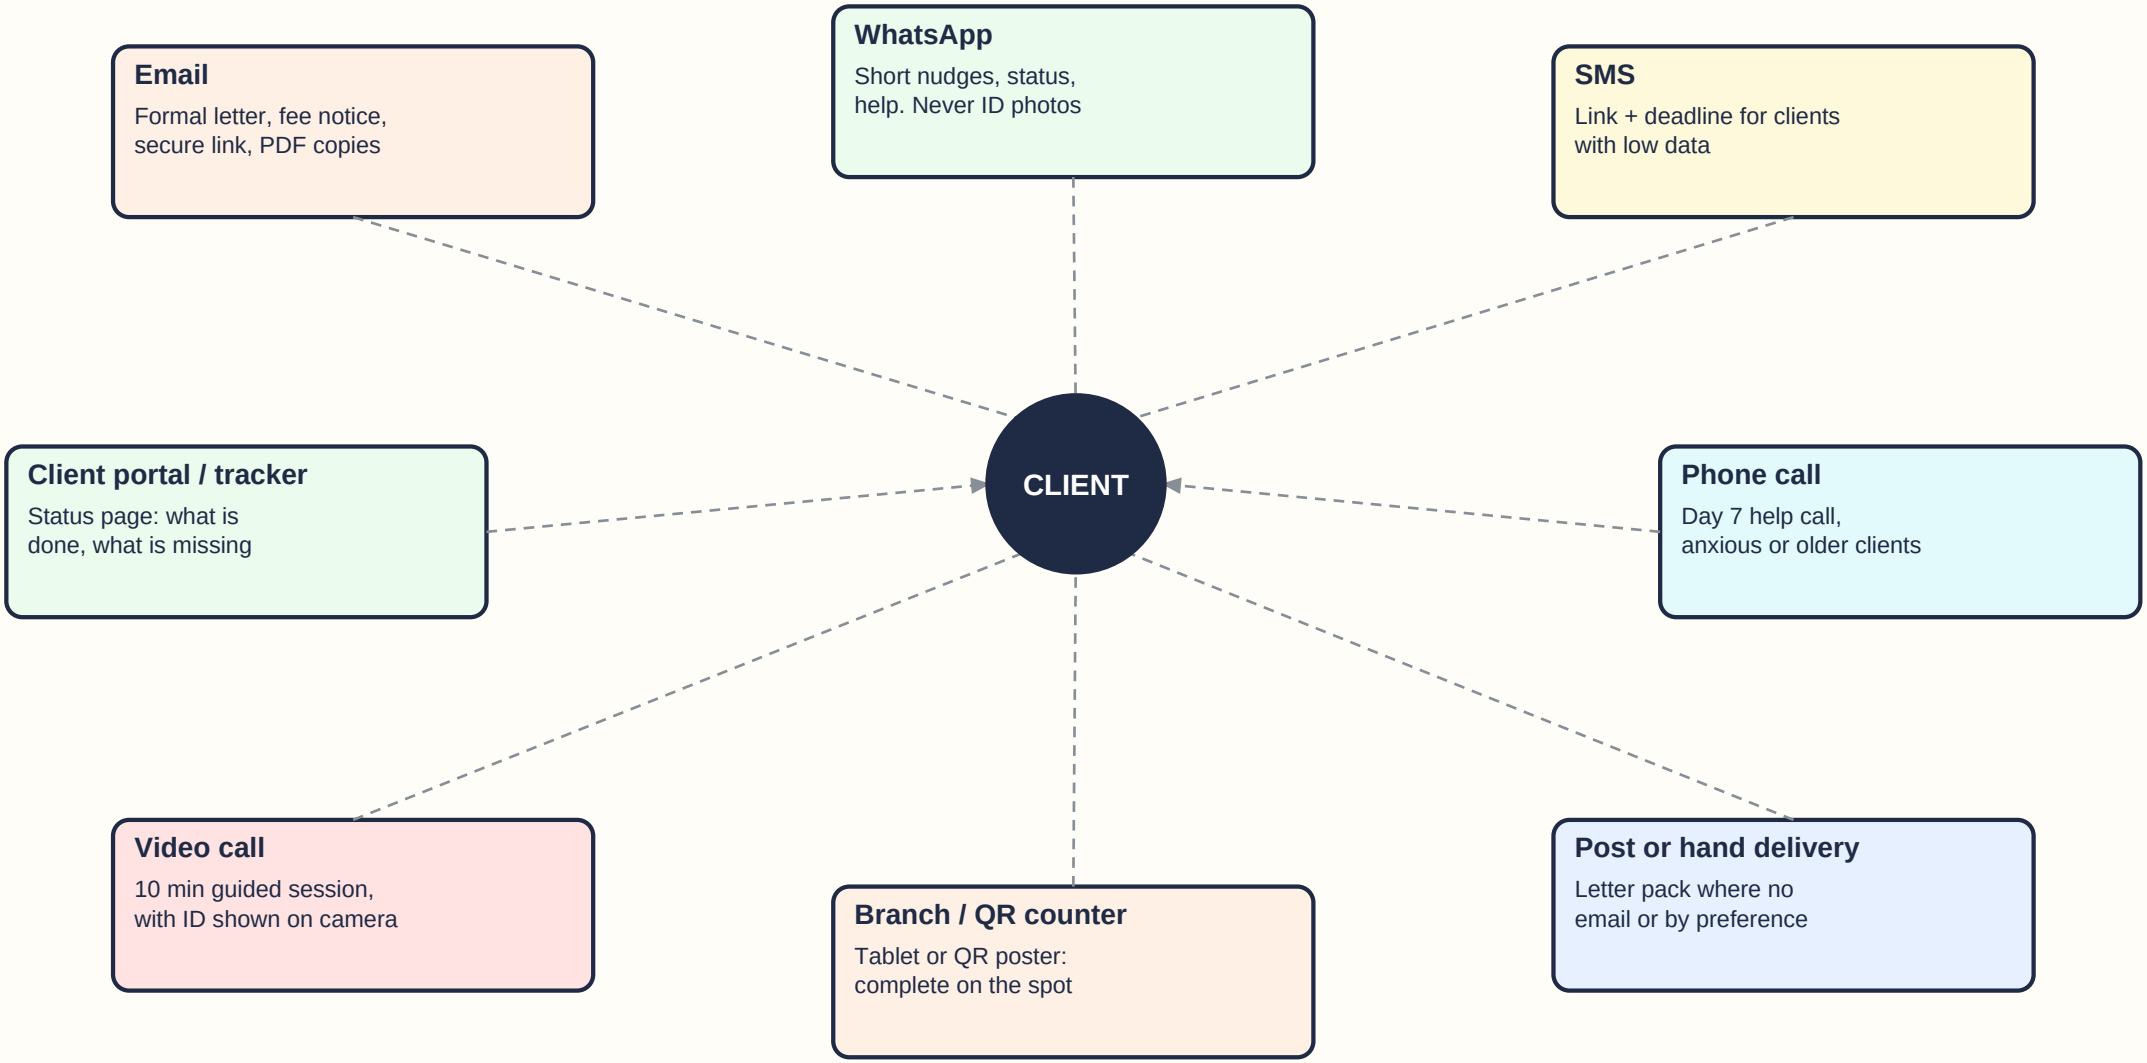

Staff list view

Case detail

Part 2: How we contact clients

Pick the channel by purpose. Keep one secure link as the only place documents are sent.

Rules: get consent for each channel and record it. One preferred channel per client. Use a branded link domain (e.g. kyc.[yourcompany]). Never ask for passwords, PINs or card numbers. Log every contact on the client record.

Part 2: Think outside the box

Ideas that make KYC feel easy and trustworthy instead of like paperwork.

Parcel style tracker

Client gets a link or WhatsApp keyword TRACK showing 5 steps: Received, Checking, Need info, Approved, Active.

KYC passport

Verify once, reuse for all entities in the same group or for later services. Fewer forms, faster revenue.

QR everywhere

QR code on quotes, invoices, email footer and the front desk poster opens the right form with the client ID filled in.

Pre filled and 5 minute

Prefill what we already know (name, contacts). Only ask for what is new or changed. Show a progress bar and time left.

Guided video option

For clients who dislike forms: a booked 10 minute call where staff fill the form with them and see the ID live.

Trust page and voice note

A short web page and a 45 second voice or video note in English, Afrikaans and local languages explaining why we ask.

Introducer channel

Accountants, lawyers and agents send their clients the link. Their clients arrive with a trusted introduction (rules to be confirmed).

Scam proof habit

Tell clients exactly what we will and will not ask. Offer call back verification of any link.

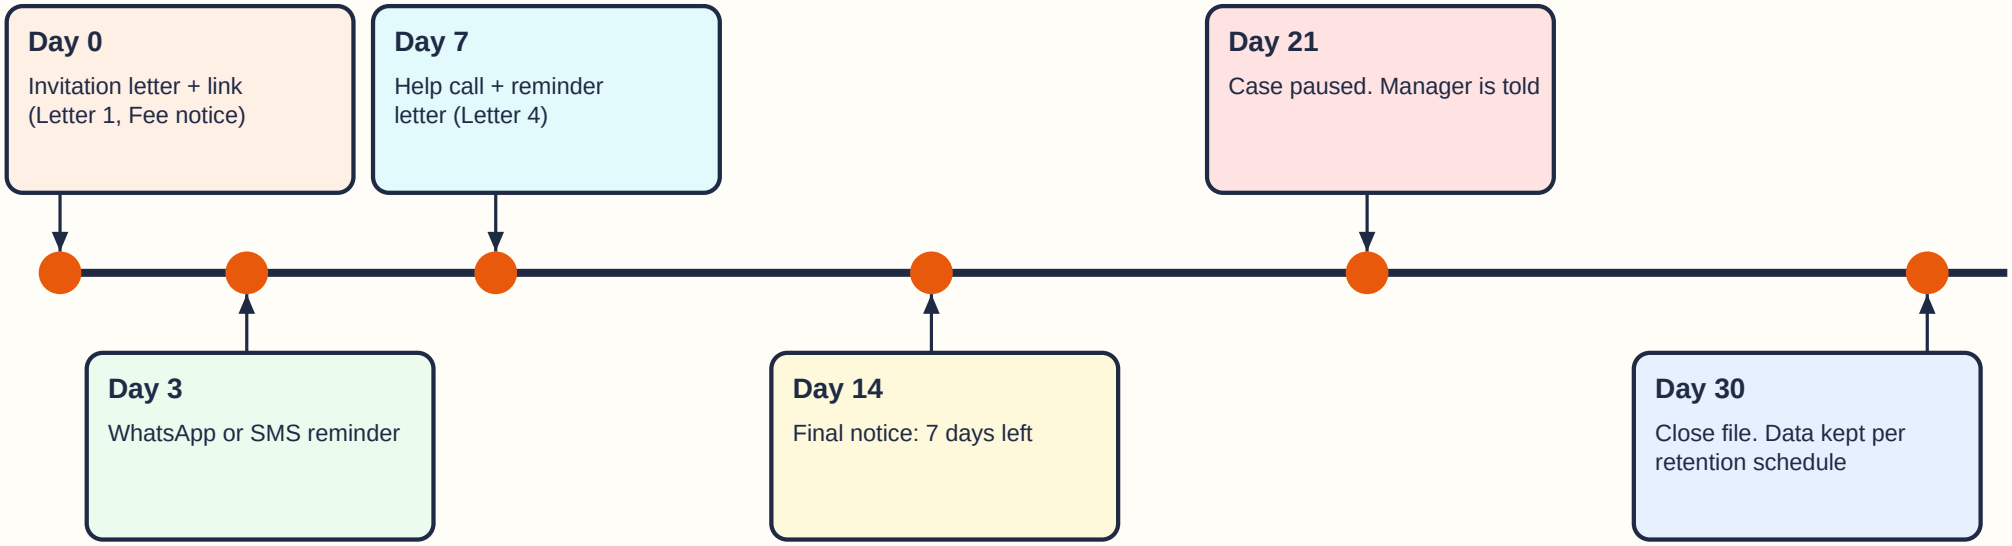

Bundle with the renewal

Fold the yearly refresh into the invoice or renewal date, so there is one touch, not two.

Test two or three of these in the pilot. Measure completion rate and time to complete.

Part 2: Contact cadence timeline

Automate the nudges, keep a human touch at the right moments.

Rules of good contact

- Reminders stop the moment the client replies or completes
- Pause reminders on weekends and after 19:00
- Same sender name and number every time
- Each message says what to do, by when, and how to get help
- A human calls before any file is paused
- Platform logs every message, channel, date and result
- Language chosen by client at sign up
- Template wording approved once by compliance and legal

Part 2: Charging for KYC work: the fee model

Be clear, fair and upfront. Show the fee before any work starts.

Tier	Typical client	Includes	Fee
1 Standard	Individual, local, low risk	Form review, ID and address check, risk rating, file set up	N$ ____
2 Business	Company, close corporation, sole prop.	Tier 1 + registration docs, directors, beneficial owners	N$ ____
3 Complex	Trust, group, foreign link, PEP	Tier 2 + source of funds, extra checks, manager sign off	N$ ____
Add on: Screening	Any tier	Third party sanctions, PEP or adverse media report	At cost
Annual review	Active clients	Refresh form, expiry checks, re rating	N$ ____ / year

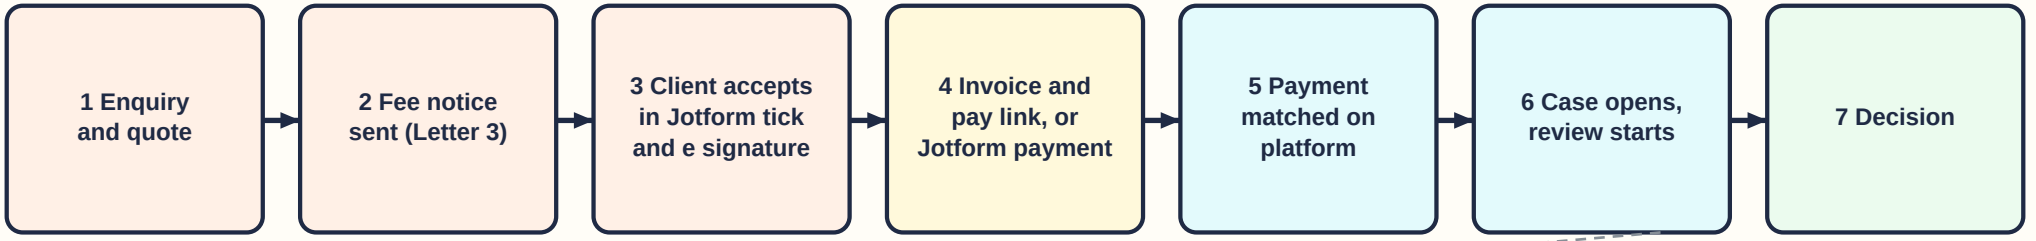

Outside the box fee ideas (all to be confirmed with legal and your own policy)

- Bundle: one fixed Onboarding Package that includes KYC, so the client sees one price
- Group pass: one verification fee covers several related entities, extra entities at a discount
- Subscription: annual fee includes monitoring, reminders and one free update
- Fast lane: client who completes in 48 hours skips the rush surcharge, or gets a small credit
- Referral credit: introducer clients get a reduced Tier 1 fee

Whether and how a business may charge clients for identification and due diligence is to be confirmed with the relevant legal bodies, authorities and entities of Namibia and any industry body. Fee amounts above are blanks for you to set.

Part 2: Fee procedure sketch: from quote to active client

Fee notice first, consent second, payment third, work fourth.

If approved

Welcome letter (Letter 5). Statement shows onboarding fee. Annual review fee date diarised. Receipt filed on the client record.

If declined

Neutral letter (Letter 6). Refund or retained admin fee as stated in the Fee Notice, to be confirmed with legal advice. Manager signs off.

If client goes quiet

Reminders per cadence. Day 21 case paused. Day 30 close. Fee notice says what is refundable and what is not.

Records kept for every paid file

- Signed or ticked fee notice with date, time and IP or device record
- Invoice, payment proof, receipt and any refund
- Third party cost invoices attached to the same case
- Fee override or waiver with reason and approver name
- Quote to invoice reconciliation each month
- Clear tax treatment on invoices, to be confirmed with your accountant and the relevant authorities

Tip: put the fee line and acceptance tick at the start of the Jotform, before any ID is uploaded. Clients who do not accept never hand over documents, which reduces data you have to protect.

Part 2: Documentation we need in place

The paper trail that backs up the process. Mark status as you complete each one.

- ☐ **KYC and client acceptance policy**
  Who we accept, when we decline, approval levels
- ☐ **Risk assessment method**
  How scores, bands and enhanced checks are decided
- ☐ **Privacy notice and consent text**
  What we collect, why, how long, client rights
- ☐ **Client terms and fee notice**
  Scope of work, fees, refunds, payment terms
- ☐ **Jotform processor record**
  Role of Jotform, region, security settings, deletion rule
- ☐ **Data retention and deletion schedule**
  How long each record is kept, how it is destroyed
- ☐ **Staff procedure manual**
  Step by step guide for each role, with screenshots
- ☐ **Case file checklist**
  What every file must hold before approval
- ☐ **Access and audit log standard**
  Who can see what, how logs are reviewed
- ☐ **Incident and breach plan**
  Who is told, how fast, templates ready
- ☐ **Complaints and queries route**
  How clients raise issues, response times
- ☐ **Training record**
  Dates, attendees and test scores for staff

Owner and review date go on each document. Review at least once a year, or when the law or process changes. Content is to be confirmed with the relevant legal bodies, authorities and entities of Namibia.

Part 2: Client letters (1 of 4)

Replace [brackets]. Have compliance and a legal adviser approve before first use.

LETTER 1 | Invitation to verify (email or post)

Subject: Your client verification (KYC): how to complete it

Dear [Client name],

Welcome to [Company]. As part of our client acceptance procedures, and where the law requires it, we verify who our clients are. This is called Know Your Client, or KYC. We have made it simple: you complete it once, on your phone or computer, in about 10 to 15 minutes.

Your personal secure link: [link]

Please have ready:

a copy of your ID or passport

proof of address not older than [3] months

for companies: registration documents, and details of directors and owners

Please complete it by [date]. Until it is done we are not able to start work or issue services.

The cost of this process is set out in the attached Fee Notice. Your information is used only for verification and is handled as described in our Privacy Notice.

Prefer to do it with us by phone or in person? Just reply and we will arrange it.

For your safety: we will never ask for passwords, PINs or card numbers, and we only send links from [domain].

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

LETTER 2 | Notice about Jotform and your data

Subject: How your information is collected and kept

Dear [Client name],

To keep verification quick, we collect your details through an online form provided by Jotform, a third party service provider that works on our behalf. Here is what happens to your information:

1 You send it over an encrypted connection.

2 We copy your submission into our own secure system and [delete it from Jotform within [x] days].

3 Only [Company] staff who need it can open it, and every access is recorded.

4 We keep records for [period] under our retention schedule, then delete them securely.

5 We do not sell your information. We share it only with screening providers or authorities where needed or required by law.

Jotform may store data on servers outside Namibia. [State the region and safeguards, to be confirmed.]

You may ask to see, correct or delete your information, subject to our legal record keeping duties. Contact [privacy contact]. The rules that apply are to be confirmed with the relevant legal bodies, authorities and entities of Namibia.

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

Part 2: Client letters (2 of 4)

Fees and follow up.

LETTER 3 | Fee notice (attach to Letter 1)

Subject: Fees for client verification and onboarding

Dear [Client name],

Verification and onboarding take real work: reviewing documents, running checks, keeping records and reviewing them regularly. This notice explains what we charge so there are no surprises.

Your tier: [Standard / Business / Complex]

1 Onboarding fee: N$ [___]. Covers form and document review, risk assessment and set up of your file.

2 Third party checks: at cost, only if used, for example screening reports. We tell you first if the cost will be above N$ [___].

3 Annual review: N$ [___] per year. Covers refresh, expiry checks and monitoring.

Payment: invoice [no.] is due within [7] days by [link / EFT details with your reference]. [We start our review when payment is received.]

If we cannot accept you as a client: [refund position, to be confirmed with legal advice].

By ticking the acceptance box on the form you agree to this Fee Notice and our Terms. VAT is [included / excluded].

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

LETTER 4 | Reminder: items outstanding

Subject: Action needed: [x] item(s) still outstanding

Dear [Client name],

Thank you for starting your verification. You are almost there. To complete your file we still need:

[ ] [Item 1, e.g. a clearer copy of your ID]

[ ] [Item 2, e.g. proof of address dated within 3 months]

Use the same secure link. Your earlier answers are saved: [edit link]. It takes about [5] minutes.

Please send these by [date]. If we have not heard from you, we will phone you on [date] to help.

Please note: after [21] days of no response a file is paused and may need to be restarted, and fees may apply [to be confirmed].

Need help? Reply to this message, WhatsApp [number] or call [number].

Please do not email ID documents to us. Use the secure link only.

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

Part 2: Client letters (3 of 4)

Outcome letters. The decline letter needs the most care.

LETTER 5 | Welcome: verification complete

Subject: Welcome to [Company]: your verification is complete

Dear [Client name],

We are pleased to confirm that your verification is complete and your client file is active. Your reference is [ID].

What happens next:

1 [Service start date or first step]

2 Your contact person is [name], [phone], [email]

3 Your onboarding fee receipt is attached

Keeping your details current: please tell us promptly if your address, contact details, directors or ownership change. We will invite you to a short yearly update by [date], and we remind you before an ID or address document expires.

You can ask us at any time what information we hold about you. Contact [privacy contact].

Thank you for helping us keep [Company] and our clients safe.

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

LETTER 6 | Unable to proceed (neutral wording)

Subject: Update on your application

Dear [Client name],

Thank you for applying to become a client of [Company]. After reviewing your application we are not able to proceed at this time.

This decision is made under our client acceptance policy. We are not able to discuss the detail of our internal checks.

[Fees: refund or retained admin fee as set out in our Fee Notice, to be confirmed with legal advice.]

We will keep or delete your information as set out in our Privacy Notice and as the law requires. If you have a question about your records, please contact [name] at [email].

We wish you well.

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

INTERNAL NOTE (do not send): the compliance officer and a legal adviser must approve this wording. Never state or hint at suspicion or any report to authorities. What may be said is to be confirmed with the relevant legal bodies, authorities and entities of Namibia.

Part 2: Client letters (4 of 4)

Yearly review, and short WhatsApp and SMS messages.

LETTER 7 | Yearly review

Subject: Your yearly details check: 5 minutes

Dear [Client name],

It is time for your yearly check. [Your ID / proof of address expires on [date].]

We have pre filled the form with what we hold. Please confirm or correct it, and upload only items that have changed: [link]

Please complete it by [date]. If your details have not changed, it takes about 2 minutes.

The annual review fee of N$ [___] is set out in your Fee Notice and invoice [no.] is attached.

Thank you for keeping your file up to date. It keeps your services running without interruption.

Kind regards,

[Name], [Role], [Company] | [phone] | [email]

W1 Invitation (WhatsApp or SMS)

Hi [Name], [Company] here. Please complete your secure client verification (10 min): [link]. Needed: ID, proof of address. Reply HELP for a call back.

W2 Day 3 reminder

Reminder: your verification has [2] items outstanding. Pick up where you left off: [link]. Reply HELP if stuck.

W3 Approved

Good news [Name], you are verified and your file is active. Ref [ID]. Welcome to [Company]!

W4 Safety line (add to all)

We never ask for passwords, PINs or card numbers. Only trust links from [domain]. Unsure? Call us on [number].

Build checklist and next steps

Tick as you go.

- [ ] Write the KYC data list per client type (individual, company, trust)
- [ ] Build Jotform with sections, conditional logic and hidden clientID field
- [ ] Set privacy notice and consent text (legal reviewed)
- [ ] Create platform endpoint or Make scenario; verify webhook secret
- [ ] Create client and case records; store files outside Jotform
- [ ] Add status flow: New, Screening, Needs info, In review, Decision
- [ ] Email templates: received, more info needed, approved, declined
- [ ] Define risk factors and approval rules with your compliance adviser
- [ ] Roles, permissions and audit log tested
- [ ] Pilot with 10 clients; measure time to decision
- [ ] Retention and deletion schedule agreed; Jotform copies removed
- [ ] Train staff; run a mock audit of five cases

Next step: tell me client types, platform choice (A or B) and I will turn this into a build plan or the Jotform field list.
